COVER LETTER

Dear Hiring Manager,

I recently came across your company's internship opportunities in the field of software and web development. Your commitment to innovative solutions and fostering an environment conducive to learning and professional growth strongly aligns with my ambition to apply my skills in real-world projects while contributing positively to your team.

I have recently completed my Bachelor's degree in Software Engineering at London Metropolitan University, where I developed a strong foundation in software development principles, web technologies, and problem-solving techniques. Alongside my academic journey, I have actively gained practical experience through freelance and internship roles that helped me strengthen my technical and professional skills.

During my time as a freelance web developer on Fiverr, I designed and developed responsive websites tailored to client requirements. This experience enhanced my ability to understand client needs, propose effective solutions, and deliver projects within deadlines. By implementing mobile-friendly and SEO-optimized designs, I ensured improved usability and online visibility for client projects.

Furthermore, as a Web Development Intern at Cognifyz Technologies, I worked on improving web application performance and enhancing user interfaces. I collaborated closely with a development team, gaining experience in cross-browser compatibility, clean coding practices, and agile teamwork. This role significantly improved my communication, problem-solving, and project management skills.

I am eager to bring this experience into a professional environment where I can continue to grow while contributing meaningfully to your organization. I am confident that my skills in HTML, CSS, JavaScript, React.js, and modern web development practices will allow me to add value to your team.

I would welcome the opportunity to discuss my application further and explore how I can contribute as an intern or junior developer in your organization. Thank you for your time and consideration.

Sincerely,
Kalid Mishal
