COVER LETTER

Dear Hiring Manager,

I recently came across your company's internship opportunities in the field of software and web development. Your commitment to innovative solutions and fostering an environment conducive to learning and professional growth strongly aligns with my ambition to enhance my technical skills while contributing positively to your team.

While pursuing my degree in Software Engineering from London Metropolitan University, I have gained valuable experience through various roles. During my time as a freelance web developer on Fiverr, I had the opportunity to design and develop responsive websites tailored to meet specific client requirements. This role strengthened my ability to gather client needs effectively, propose practical solutions, and deliver projects on time. By incorporating mobile-friendly and SEO-optimized practices, I ensured broad reach and engagement for client projects.

Furthermore, as a Web Development Intern at Cognifyz Technologies, I focused on improving web application performance and enhancing user interfaces. During this internship, I learned the importance of collaboration, working closely with a skilled team to ensure cross-browser compatibility and advocate for clean coding practices. Each project came with unique challenges that I navigated through critical thinking and effective communication, significantly improving my project management and teamwork skills.

I am eager to bring these experiences to your organization and am confident that my skills in HTML, CSS, JavaScript, React.js, and other modern web technologies will complement your ongoing projects. My goal is to contribute fresh perspectives while continuing to expand my knowledge through real-world applications.

I look forward to the opportunity to discuss my application further and explore how I can contribute as an intern to your esteemed team. Thank you for considering my application.

Sincerely,

Kalid Mishal
